

ENERGY POLICY

We, Jindal Steel & Power (JSP) aspire to be a responsible corporate citizen that enhances the quality of life of all stakeholders through sustainable development with utmost care for the environment with efficient energy uses. Our ultimate goal is to become net zero emitters of Carbon Dioxide.

We are committed to continually improve energy efficiency and reliability of our operations and shall carry out all processes in an efficient manner that enhances energy performance.

We shall be guided by principles of Energy Management System and ensure:

- Availability of required resources and information relevant for achieving improvements by setting objectives, targets and energy management action plans,
- Compliance with applicable legal and other requirements for energy use, consumption and efficiency,
- Spreading awareness on importance of energy management across all levels of the Organization,
- Monitoring of energy use, energy consumption and practices by deploying effective real time data capturing and analysis tools,
- Adoption of appropriate practices and technologies that enhances energy efficiency through recovery of waste energy and utilization of renewable or alternative energy sources, wherever feasible,
- Integration of energy performance requirements while taking decisions related to process or equipment modifications, design and renovation activities including procurement of energy services, products, equipment and energy.
