Introduction to Green Procurement Policy

The Green Procurement Policy is applicable to all stages of the upstream value chain back to the primary production level. The aim of the GPP is to ensure that JSIS buys energy-efficient equipment, products and services where these are expected to have a significant impact on the energy performance.

JSIS GPP was implemented in 2018 & reviewed in Jan 2021 to reinforce our commitment of working in an environment friendly manner towards a long-term, sustainable and successful future for all parties. The aim of GPP is to ensure that we reduce our environmental impact.

What is Green Procurement?

Green Procurement means purchasing products and services that cause minimal adverse environmental impacts. It incorporates human health and environmental concerns into the search for high quality products and services at competitive prices.

Specifications that are mandatory

1. Procurement of material that does not contain asbestos material
2. Procurement of material that does not contain CFC
3. Import of material strictly as per the local environment rules set by the Government
4. Zero supply of material having radioactivity higher than prescribed by Government of Oman

Specifications that are desirable

JSIS is committed to procure material

1. with improved recyclability, high recycled content, reduced packing;
2. with greater energy efficiency;
3. utilizing clean technology and/or clean fuels;
4. which result in reduced water consumption;
5. which emit fewer irritating or toxic substances during installation or use; or
6. which result in smaller production of toxic substances, or of less toxic substance, upon disposal
7. that utilizes the waste from some other processes or industries
